

Curriculum Vitae

Personal information	
Name	Peter Obert
Position	Technical Expert/Consulting Technical Manager Integration and Cloud Competence Centre (ICCC)
Contact	- e-mail : peter.obert@oracle.com - Office: Galvaniho 17/A, 82104 Bratislava Slovakia - Phone: +421.2.58223138 - Mobile: +421.918.770.822

Core competencies/Career	
Product and technology competencies	- Oracle Products - OER 12c, API Catalogue 12c - Integration Cloud Service, Messaging Cloud Service - WLS 12c, Java Cloud Service - Oracle BTM 12c, - OEM 12c APM - BTM, RUEI, JVMD - Oracle BPM 12c - Oracle BAM 12c - Oracle SOA 12c (OEP, ESS, BPEL, EDN, Rules, OSB, Mediator, MFT) - Oracle Enterprise Manager 12c - Oracle Virtual Assembly Builder 12c - Oracle Business Transaction Monitoring 12c, 11g - Oracle Cloud Management 12c - Oracle Virtual Machine 3.0 - Oracle Exalogic, Exalogic Virtualization X2-2 - Oracle Universal Content Management 11g, WCCM 11g - Oracle Weblogic Server 10.x (11g) - Oracle Service Bus 11g - Oracle Business Process Management BPM 11g - Oracle AIA - PIPs for Communication 2.x, 11g (O2C, O2B, O2A, AABC, PMDM) - Oracle AIA - Application Integration Architecture Foundation Pack 2.0..3.0, 11g - Oracle Enterprise Governance Suite 11g - Oracle Enterprise Repository OER - Oracle Service Registry OSR - Oracle EM SOA Management Pack - Oracle WSM - Oracle Coherence – Partitioned Data Management - SOA Suite 10g/11g - Oracle BPEL PM - Oracle Business Rules - Oracle ESB - Oracle Web Service Manager - Oracle BAM - Oracle Service Registry (UDDI) - Oracle 10g Application Server - Oracle Database Server 9i, 10g, 11g - Oracle WebCache - Oracle Application Test Suite OATS - Oracle Real User Experience Insight ORUEI - Oracle Unified Method OUM - Oracle BPA - Oracle Data Integrator ODI 10g, 11g - Oracle Business Intelligence Publisher 10g, 11g

	• Programming Languages and standards ◦ Java (J2EE, J2SE): EJB, JMS, JNDI, JDBC, Web Services, Portlets, JSP, Servlets ◦ ASP.NET (1.0-3.0) ◦ Hibernate, JDO, ADO.NET ◦ UML, BPM, BPEL4WS ◦ XML, XSL, HTML, Java Script ◦ PLSQL, TransactSQL, SQL ◦ C, C++, C#, 4GL, D4GL, Pascal, Occam, Centura SQL • Development tools ◦ IntelliJ Idea, Eclipse, Eclipse Modeling Framework, Bea Workshop, Ant, JUnit, Jbuilder, JDeveloper, NetBeans, Ms Visual Studio ◦ GIT, CVS, SVN, Team Object Manager, Ms Team Foundation, Apache Maven • Continual build ◦ Lintbuild, Hudson, Nexus, Apache Maven, Jenkins • Scripting ◦ Shell, ant, python/jython, WLST • Databases ◦ MS SQL, Informix, PostgreSQL, Oracle 10g/11g • UML Analysis and modeling tools ◦ ErWin, Telelogic Tau, Enterprise Architect, BPA Suite, ArchiMate • Operation Systems ◦ Windows, Linux, Unixware, SCO Unix, AIX, Digital Unix, MSW2k, MSW3, MSMSBS R1-2 • Application Servers ◦ Oracle AS(OC4J), Oracle WebLogic, IBM Websphere, Tomcat/Jboss, Sun Enterprise AS • Middleware platforms ◦ Oracle Fusion Middleware, BEA Weblogic Integration (WLI), BEA AL ESB, IBM MQ Series • Web Servers ◦ Apache, IIS • Test Tools ◦ Canoo Webtest, BadBoy Webtest, Mercury TestDirector, Mercury QuickTest, SOAP UI, J Meter, Oracle Functional Testing, Oracle Application Testing Suite OATS • Methods and Frameworks ◦ Oracle Unified Method OUM, Oracle Architecture Development Process OADP, Oracle Enterprise Architecture Framework OEAF, Rational Unified Process RUP, SCRUM, Project Management Institute PMI, TOGAF
Industry competencies	• Telco Industry, General Insurance, Health Insurance, Manufacturing • General knowledge within the performance management of organizations. Main expertise is within solution architecture, design, architecture impact analysis and implementation • Disaster Recovery Management and platform specific DR Management implementation • Telco Enterprise Application Integration and industry standards ETOM, TAM, SID
Process competencies	• SW development, Project Management, Process Analysis, UML Analysis, Integration Architecture and Enterprise Architecture
Education	
1988 - 1993	• Slovak University of Technology - Faculty of Informatics and Electrical Engineering, specialization Electronic Computers

Certification/Training

- **TOGAF 9 Certified (2016)**
- ArchiMate 2.1 (2016)
- Oracle Integration Cloud Service – Rapid Start (2015)
- Oracle Java Cloud Service – Rapid Start (2015)
- Cegos - OTD Communicating for Impact (2014)
- Oracle SOA&BPM 12c Expert Training – Fast Track (2014)
- Situation Management Systems – Positive Power and Influence® Program (2014)
- Virtualized Exalogic Training (2014)
- **Oracle Consulting Excellence Membership** (2014)
- **ITIL® Foundation Certificate in IT Service Management** (2013)
- Cegos – Managing Emotions in Tough Situations(2013)
- Oracle Value Selling (2013)
- Oracle Enterprise Architecture Master Class (2012)
- Cape BPM – Oracle BPM 11g Best Practice (2012)
- Global Enterprise Architecture Program - GEAP - ITSO - Cloud Computing and Engineered Systems (2012)
- Dale Carnegie – High Impact Presentations (2012)
- Oracle Enterprise Manager 12c and Business Process Transactions Monitoring 12c (2012)
- Oracle Virtual Machine OVM 3.0 (2012)
- EXA Advanced Technical Specialization Program (2011)
- Global Enterprise Architecture Program – GEAP – SOA and BPM strategy (2011)
- Oracle Enterprise manager – Grid Control (2011)
- Communications Industry for Architects Deep Dive (2011)
- Cloud Computing Academy(2011) Exalogic/Exadata and Computing Automation
- Oracle UCM 11g Administration (2010)
- **Oracle SOA 11g Foundation Practitioner English - 1Z0-451-ENU Certificate** (2010)
- Oracle Coherence – Partitioned Data Management (2010)
- Communications Middleware Architecture – Telco BSS stack and OFRA (2009)
- Oracle SOA-Suite 11g (2009)
- Oracle Weblogic Server and Oracle Service Bus – Advanced Administration Workshop(2009)
- Oracle Fusion Reference Architecture – reference integration architecture workshop for trainers (2009)
- Oracle Real User Experience Insight ORUEI(2009)
- Oracle Application Testing Suite OATS(2009)
- Oracle Fusion Middleware Governance (2009)
- Build JavaEE Applications using Oracle ADF (2008)
- SOA Orchestration (2008)
- SOA High Availability and Performance Tunning (2008)
- **PMI – Project Management Institute Certificate** (2008)
- Oracle Unified Method (2008)
 - OUM 3.0 certified teacher for OUM Gathering Requirements and OUM Essentials, PJM Essentials
- ASP.NET Architect Camp (2004)
- IBM WebSphere MQ Series (2003)
- IBM WebSphere Content Management (2003)

- Java programming, Oracle OC4J (2002)
- Several Java and JEE courses
- Several Informix DB and Informix 4GL
- Courses of UML and Object Oriented analysis

Teaching

- JCS Rapid Start / JCS Readiness Service Bootcamp – OCS Tech EMEA , Bratislava 2015 (English)
 - Oracle DBaaS
 - Oracle JCS – PaaS
 - Rapid Start Service
 - JCS Hands On
 - DB Migration do DBCS
 - JEE/Java Application Migration to JCS
 - Developer Cloud Service Hands On
 - JCS service Utilization Roadmap Creation
- Oracle Global Architect Program - Partner Academy, Ljubljana Mar 2012 (English)
 - Enterprise Architecture Process (EAP)
 - Oracle Unified Method and EAP alignment
 - Oracle Enterprise Architecture Development Process
 - EAP and Industry Standards
 - Discovery Architecture Process
 - Examples of Discovery Architecture Process in the Context of Enterprise Architecture
- Oracle SOA Suite 11g implementation Boot Camp - Partner Academy Jan 2012 (Slovak)
 - SCA Architecture
 - SOA Patterns
 - Mediator architecture
 - BPEL PM architecture
 - BPEL PM synchronous and asynchronous invocation
 - BPEL PM human workflow
 - BPEL PM adapters, notifications, sensors
 - SOA Error Handling
 - Event Delivery Network
 - B2B Integration
 - Rules Engine
 - BAM Architecture
 - OSB architecture
- Oracle Global Architect Program - Partner Academy, Bratislava Nov 2011 (Slovak)
 - Enterprise Architecture Process (EAP)
 - Unified Method and EAP alignment
 - Oracle Enterprise Architecture Development Process
 - EAP and Industry Standards
 - Discovery Architecture Process
 - Examples of SOA Assessment and Architecture Road Plan, Impact Analysis and reuse of outputs of Discovery Architecture Process for the Enterprise Architecture Planning Process

- Oracle SOA Suite 11g Build Composite Applications - Oracle University May.2011 (English) Live Virtual Class
 - SCA Architecture
 - SOA Patterns
 - Mediator architecture
 - BPEL PM architecture
 - BPEL PM synchronous and asynchronous invocation
 - BPEL PM human workflow
 - BPEL PM adapters, notifications, sensors
 - SOA Error Handling
 - MDS services
 - Rules Engine
 - BAM Architecture
 - OSB architecture
 - Coherence Overview
- Oracle AIA for Comms Workshop for Architects: NGOSS – Slovak Telecom - 18.2.2011 (English)
 - AIA overview
 - AIA and NGOSS
 - TMF and Industry Standards
 - AIA and Common Domain Model
 - CDM Adoption - Project Stories
- Oracle SOA Suite 10g R3: Administration – Oracle University- 29.4-30.4.2009 (Slovak)
 - Oracle Application Server 10g R3
 - Administer Oracle AS 10g R3 components
 - Administer and monitor Oracle BPEL
 - Administer and monitor Oracle ESB
 - Administer and monitor OWSM
 - Implement high availability for SOA Suite components
 - Back Up and Restore Oracle Application Server
 - Manage clustering of SOA components
 - Troubleshoot Oracle SOA Suite
- Oracle BPEL PM on WebLogic – Partner Academy - Prague 23.2-25.2.2009 (English)
 - Oracle SOA Roadplan, Oracle AIA overview
 - SOA Architecture
 - SOA Patterns
 - BPEL PM architecture
 - BPEL PM synchronous and asynchronous invocation
 - BPEL PM human workflow
 - BPEL PM adapters, notifications, sensors
 - BPEL PM practice examples
 - SOA Best Practice
- SOA Architect Workshop – Partner Academy – Vilnius 28.1-30.1.2009 (English)
 - SOA Architecture
 - SOA Patterns
 - SOA approach and integration use cases

	SOA Suite components - orchestration example SOA practice examples • SOA Orchestration – Oracle University - Bratislava 12/2008 (Slovak) - SOA Architecture - SOA Patterns - SOA approach and integration use cases - SOA Suite components - SOA Integration with J2EE - UDDI - Web Service Security • SOA Architect Workshop – Partner Academy – Tallinn 18.11-20.11.2008 (English) - SOA Architecture - SOA Patterns - SOA approach and integration use cases - SOA Suite components - orchestration example - SOA practice examples • EMEA knowledge transfer – SOA Orchestration 07/2008(English) - OUM SOA Orchestration training base + ICCC Project best project experience patterns • Build JavaEE Applications I – Oracle University – Bratislava .03/2008 - JEE Web application Development using servlets, JSP, JSF, Oracle ADF, EJB 3.0, TopLink, Web Services and Oracle Jdeveloper as complex JEE IDE. • FIIT STU Bratislava (Faculty of Informatics and Information Technologies of the Slovak Technical University) - Presentations for Web Engineering – 2005, 2006 - J2EE Architecture - J2EE Solutions - J2EE Core Patterns • FMFI UK Bratislava (Faculty of Math, Physics and Informatics of the Komensky University) - Presentations for System Engineering – 2006 - J2EE Architecture - J2EE Solutions - J2EE Core Patterns

German	Basics
Main project experience	
Technical Manager – Oracle ICCC (1.2008-current)	I work as a SOA and Application Integration Architecture Expert/ Consulting Technical Manager in the Integration and Cloud Competence Centre for the Eastern and Central Europe, Middle East

	and Africa. The most skilled and experienced consultants within Oracle's newest technology are to be found within ICCC. ICCCs goals are to create and implement successful Integration and Consolidation Solutions for our Oracle customers in the region. Our solution areas are: Cloud Computing, SOA and Integration, Big Data, Internet of Things, Identity and Access Management and Master Data Management Solutions. ICCCs technical consultants all have an extensive Java skill base. <u>Responsibilities:</u> • Consultancy in pre-sales, analysis, design, implementation and delivery phases of projects • Responding to RFI/RFPs • Creation of solutions, logical and technical architectures • Scoping the projects • Presentations of solution concepts for customers • Implementation of Proofs Of Concept • Providing product demonstrations • Coaching and mentoring • Driving regional initiatives in Oracle • Creating project plans and Qualified Estimations • Trouble-shooting and Performance optimization • SOA and BPM Assessment • Cloud Architecture Assessment • Enterprise Architecture Assessment
Performance Optimization (Troubleshooting)	• Customer: Wesleyan UK • Industry: Insurance • Country: UK • Language: English • Role: FMW Technology Architect • Date/Duration: 09/2016 Description: • Performance optimization and troubleshooting – casting hypothesis, evaluation and fixing steps implementation • FMW(SOA and OSB) diagnostic inputs collection and analysis • Quick win tasks plan suggestion • Quick win optimization testing – deployment optimization and SOA meta-data store purging • Creating task plan for optimization and performance stabilization of FMW environments • Technology: Oracle FMW 11g (OSB, PBEL PM, Mediator, WSM) • Other tools and methods: Oracle Unified Method, Thread Logic, Virtual VM, RDA tool
Solution Driven Design (SDD)	• Customer: Vodafone Malta • Industry: Telco • Country: Malta

	• Language: English • Role: FMW Technology Architect • Date/Duration: 08-09/2016 Description: • Project Inception and Solution Concept design for RODOD (Rapid Offer Design Order Delivery) implementation for postpaid products(FMW Part) • Project Inception – setting approach for AIA FMW integration approach and Integration infrastructure • Current FMW 11g solution analysis – reverse engineering • Preparing Use Case profiles for re-use of existing SOA/FMW layer and estimating integration project effort for Elaboration, Construction and Go-Live • FMW Projects/Sources Migration testing to 12c • Technology: Oracle FMW 11g (OSB, PBEL PM, Mediator, Rules, WSM), Oracle SOA Suite 12c (OSB +BAM+BPEL PM, MFT, OPSS) • Other tools and methods: Oracle Unified Method, TOGAF
SOA Upgrade Assessment	• Customer: Wolseley UK • Industry: Distribution • Country: UK • Language: English • Role: FMW Technology Architect • Date/Duration: 06-08/2016 Description: • Reviewing and designing Wolseley Monitoring Solution. Design for OEM 12c extension – Application performance monitoring with BTM, JVMD • Reviewing SOA 11g -> SOA 12c side-by-side phased migration approach • Monitoring infrastructure set-up and JVMD Installation • Wolseley FMW Deployment and Continual integration review • Root Cause Analysis of current FMW 11g problems • Demonstration and configuration of OEM 12c capabilities for Wolseley Pre-Prod, Prod Environments. Creating templates and documenting how to do: Environment Compliance, Monitoring Templates, Thresholds and SLAs setup/customization, Notification Rules, Monitoring Groups, Continuous Diagnostics...

	• Documenting the SOA Health-check - FMW RDA based Recommendations for OSB, SOA, WLS - Thread Dump based Recommendations - Heap Dump Based Recommendations • Technology: Oracle OEM 12c (+ JVMD, ADP, BTM), Oracle SOA Suite 11g(OSB, SOA, WSM), Oracle SOA Suite 12c (OSB +BAM+BPML PM, MFT, OPSS) • Other tools and methods: Oracle Unified Method, ThreadLogic, Visual VM, Oracle Remote Diagnostics Agent, TOGAF – Technology Architecture
FMW DevOps Assessment	• Customer: Norea, Platform Services • Industry: Financial • Country: Denmark • Language: English • Role: FMW Technology Architect • Date/Duration: 04-05/2016 Description: • Assessment - gathering requirements for expected Operational Services from the newly established SOA Platform Team • Identification of initial set of tasks, and gaps to bridge to be able to provide IT Services for Continuous Integration and SOA Platform Operations description and recommendations. • Creating inventory of IT Services/ Tasks for: - Infrastructure set up - FMW Operations - FMW Administration and Monitoring - Hardening FMW configurations of deployed SOA and OSB composites and components - Canonical model Governance - Patch Management ... • Elaborating Gaps • Demonstration of OEM 12c capabilities for Environments Compliance, Monitoring Templates, Thresholds and SLAs setup/customization, Integration with BMC Remedy, Continuous Diagnostics,... Documenting the SOA Health-check • Technology: Oracle OEM 12c, Oracle SOA Suite 12c (OSB+BPM+BAM+BPML PM), Confluence, Stash, BMC Remedy • Other tools and methods:

SOA Healthcheck

- Customer: ACCA, Global IT
 - Industry: Education
 - Country: UK
 - Language: English
 - Role: FMW & Integration Expert
 - Date/Duration: 03/2016
- Description:
- SOA Health-check using: FMW Enterprise Deployment Guide, Remote Diagnostics and Oracle FMW tuning and optimization guide.
 - Providing Thread Dump Analysis and SOA Issues root cause analysis
 - Creating environments detailed description and recommendations to: Infrastructure set up, FMW Operations, Administration and Monitoring, Hardening FMW configurations of deployed SOA and OSB composites and components
 - Initial recommendations and possible options of upgrading current environments from FMW 11g to 12c including SOA Cloud Service and Integration Cloud Service exploitation.
- Documenting the SOA Health-check
- Technology: Oracle RDA, Thread Dump Analyzer, Thread Logic, OEM, Oracle ICS, Oracle SOA CS
 - Other tools and methods: Oracle Unified Method

SOA Assessment

- Customer: National Settlement Depository
 - Industry: Financial
 - Country: Russia
 - Language: English/Russian
 - Role: FMW & Integration Expert, Enterprise Architect for SOA domain
 - Date/Duration: 02/2016
- Description:
- SOA Assessment using: Oracle SOA Maturity Model along with the Oracle SOA maturity model calculation tool.
 - Providing Gap Analysis and SOA Roadmap tasks, work breakdown structure
 - Initiation of SOA Design time and SOA Runtime Governance.
 - Creating baseline SOA roadmap for next 3 years.
 - Initiate discussing with project portfolio

	- management, planning and schedule/re-schedule planned actions. - Documenting the SOA Assessment - Technology: Oracle SOA 12c, MFT, OEM 12c – SOA Mgmt Pack, Oracle OEM 12c Cloud Control - Other tools and methods: Oracle Architecture Development Process, Oracle Unified Method, Oracle Enterprise Architecture Framework
SOA Advisory	- Customer: Eskom South Africa - Industry: Utility - Country: South Africa - Language: English - Role: FMW & Integration Expert, Enterprise Architect for SOA domain - Date/Duration: 08/2015-01/2016 - Description: - SOA Advisory for SOA Roadmap and planning. Advisory for creating SOA Reference Architecture Library including best practice for Service Analysis and Service Engineering. - Implementing Rapid Start of SOA Operations and Administration of Oracle FMW. - Implementing and documenting Eskom SOA Governance Rapid start focused on SOA and IT Asset management. - Initiation of SOA Design time and SOA Runtime Governance. - Testing and Documenting the solutions - Technology: Oracle SOA 12c, MFT, BPM 12c, Oracle BI, Oracle JDeveloper 12c, OER 12c, OEM 12c – SOA Mgmt Pack, Oracle DB Server 12c, Oracle OEM Cloud Control, Oracle Elastic Cloud 2.x - Exalogic - Other tools and methods: Oracle Architecture Development Process, Oracle Unified Method, Oracle Enterprise Architecture Framework, ArchiMate 2.1, Shell, WLST
Oracle OSS Stack Upgrade	- Customer: Vodafone UK - Industry: Telco - Country: U.K. - Language: English - Role: FMW & Integration Expert - Date/Duration: 05/2015-08/2015 - Description: Oracle RODOD, RSDOD solution for VF UK (NewCo). - Designing Dual Run Architecture for the dual

	- running of Old OSM, UIM instances and new upgraded OSM instance during the upgrade and with 3 month duration after the upgrade of OSM and UIM. - Performing As-Is current state, current capabilities and current integration processes discovery for the dual run resolution. Designing Dual Run and Target Deployment Topology and Physical Architecture. - Performing To-Be state definition and gap analysis to conclude design and product configurations (UIM, OSM, ASAP), impact to AIA solution and FMW configurations. - Implementing Dual Run Integration Configurations - Implementing Dual Run Technical components(45 integration flows) - Testing and Documenting the solution
	- Technology: - Oracle RODOD, RSDOD products(OPH4C, AIA4C 11g, AIA MDM 11g, AIA AABC 11g, AIA O2C 11g, CRM4C 11g, OSB 11g, OBRM, OSM 7.0.3, OSM 7.2.4.1, OUIIM 7.2.4.2, ASAP), ODI 11g, WLS 10.3.6, WLST, JDEV 11.1.1.7 - Other tools and methods: - Oracle Architecture Development Process, Oracle Unified Method, Oracle Enterprise Architecture Framework, Hermes JMS, ANT, Jdeveloper, SOAP UI
Oracle Cloud Services	- Customer: Oracle EMEA Consulting - Industry: IT - Country: Slovakia - Language: English - Role: SOA & Integration Expert. Technical Expert for FMW - Date/Duration: 4/2015 - Description: - Preparation of Hands-on parts for the Java Cloud Service Trainers PaaS Rapid Start - Java/WLS Infrastructure creation and review - Java Developer and Project Team Acceleration using GIT, Hudson, Maven Issue Tracking and Task management - Technology: - Oracle WLS 12c, Oracle Enterprise DB 12c, GIT, Maven, Hudson - Other tools and methods: - Oracle Architecture Development Process, Oracle Enterprise Architecture Framework, GIT, Hudson, Maven, JDeveloper, Eclipse
SOA Assurance	- Customer: MTN Nigeria - Industry: Communications - Country: Nigeria – remote access - Language: English

	• Role: SOA & Integration Expert. Enterprise Architect for SOA Domain • Date/Duration: 3/2015 -4/2015 Description: Review of the MTN SOA Hub Solution for Nigeria, Uganda, Kenya, Tanzania. - Design and implementation Review of the Enterprise Service Framework - SOA and Integration system - Architecture and development review - SOA Infrastructure review - Information Architecture review - Integration Solution review Evaluating use of Oracle Fusion Middleware and SOA & Integration best practice. • Technology: Oracle SOA Suite 11gR1 Patch Set 6, Oracle RDA, WLS – WLST, OEM, Thread Logic • Other tools and methods: Oracle Architecture Development Process, Oracle Unified Method, Oracle Enterprise Architecture Framework, IT Strategies of Oracle SOA
Application Monitoring – Solution Design	• Customer: Worldpay • Industry: Financials • Country: United Kingdom • Language: English • Role: Oracle Technical Architect • Date/Duration: 02/2015 Description: Designing Application performance monitoring and management using OEM 12c modules – BTM 12c and JVMD. Preparing deployment topology for the agent/observer side and discovery configuration. Designing Sandbox and Production deployment topology with Maximum Availability through 2 geographic locations. Documenting and implementing Solution Architecture and process of sizing and future scaling of the solution. • Technology: Oracle OEM 12c, Oracle BTM 12c, Oracle WLS 10.3.6, Oracle DB 11g, JVMD, OEM 12c Cloud Control • Other tools and methods: Oracle Architecture Development Process, Oracle Unified Method, Oracle Enterprise Architecture Framework, ITSO SOA
Oracle SOA CoE	• Customer: MTN Group, Dubai • Industry: Communications • Country: United Arab Emirates • Language: English • Role: SOA & Integration Expert. Enterprise Architect for

	- SOA Domain. - Date/Duration: 01/2015 - Description: - Scoping and Designing IT services for the creation of SOA CoE for the Mobile Telecommunication Networks Group. - Estimation of the effort to adopt Oracle SOA best practice and processes connected to Oracle SOA CoE and SOA Governance. - Preparing roadmap for take over MTN SOAs and SOA Services lifecycle. Estimation through the phases of Stabilize, Consolidate, Standardize and Optimize SOA within MTN. - Technology: - Oracle SOA 11g(OSB, BPEL, Mediator, B2B, JCA), Oracle SOA 12c, Oracle SOA Enterprise Repository 12c, Oracle API Catalog 12c, OEM 12c - Other tools and methods: - Oracle Architecture Development Process, Oracle Unified Method, Oracle Enterprise Architecture Framework, ITSO SOA
SOA Assessment	- Customer: National Settlement Depository, Russia - Industry: Financial - Country: Russian Federation - Language: English, Russian - Role: SOA & Integration Expert. Enterprise Architect for SOA Domain. - Date/Duration: 10/2014-11/2014 - Description: - Performing As-Is current state, current capabilities and current processes implemented within SOA/Integration layer in NSD solution. - Review of the current SOA Architecture, review and suggestions to the NSD SOA Reference Architecture. - Design and implementation Review of the АСПКД SOA and Integration system. - Architecture and development review - SOA Infrastructure review - Information Architecture review - Integration Solution review - Preparing SOA baseline and initial SOA Roadmap creation - Delivering knowledge for the SOA as IT strategy, SOA Suite 12c New Features, SOA Governance Framework, Oracle SOA Reference Architecture, SOA ROI... - Technology: - Oracle SOA 12c, Oracle SOA Suite 11gR1 Patch Set 6, Oracle RDA, WLS – WLST, OEM, Thread Logic - Other tools and methods:

	Oracle Architecture Development Process, Oracle Unified Method, Oracle Enterprise Architecture Framework, ITSO SOA
Error Handling Framework - Vodafone NewCo Industrialisation	- Customer: Vodafone UK - Industry: Telco - Country: U.K. - Language: English - Role: SOA & Integration Expert. Enterprise Architect for SOA Domain. - Date/Duration: 05/2014-09/2014 Description: Oracle RODOD solution Error handling E2E concept designing based on NewCo R2.3 solution. Performing As-Is current state, current capabilities and current processes for the error resolution within SOA/Integration layer in RODOD solution for VF UK. Performing To-Be state definition and gap analysis to conclude design and product configurations, policies, new components and AIA product improvements for RODOD error handling Defining and Designing continual improvement packages for the Error Handling and Root Cause Analysis – Incident and Problem Management, Operation Procedures Improvement 1. Participation on BTM 12c Setup for E2E business transaction monitoring for the Oracle RODOD Order related integration flows(PoC) 2. OSM Performance monitoring(Java, WLS), optimization hypothesis formulations, improvements suggestions and improvements evaluations - Technology: - Oracle RODOD products(OPH4C, AIA4C 11g, AIA MDM 11g, AIA AABC 11g, AIA O2C 11g, CRM4C 11g, OSB 11g, OBRM, OSM, OUI, ASAP), ODI 11g 1. OEM 12c, BTM 12c 2. OEM 12c, Thread Logic, JConsole - Other tools and methods: Oracle Architecture Development Process, Oracle Unified Method, Oracle Enterprise Architecture Framework
Bank IT Strategy - SOA Program Initiative	- Customer: Equity Bank Kenya - Industry: Banking and Financial Services, Telco - Country: Kenya - Language: English - Role: Enterprise Architect with SOA domain specialization. - Date/Duration: 05/2014 Description: Onsite SOA Assessment to gather current

	Technology: capabilities, future vision, gap analysis and initial roadmap to Start build SOA and Enterprise Governance. Preformed sessions for SOA, SCA, Governance, Oracle concepts for Telecommunications. Proposing Program Package contained supported Oracle SOA and Governance Concepts. Oracle Architecture Development Process, Oracle Unified Method, Oracle Enterprise Architecture Framework
SOA Initial Physical Architecture and SOA Governance Project Startup	- Customer: Ministri Of Education – SAE - Industry: Government - Country: SAE - Language: English - Role: Pre-sales. RFP Program Package to design and implement SOA Physical Architecture and initial SOA Governance Project. - Date/Duration: 04/2014 - 05/2014 Description: I prepared Offer of tasks and project breakdown structure responding RFP in the form of Program Package – HL project plans, estimations, deliverables and tasks performed. Proposing Program Package contained supported Oracle SOA and Governance Concepts. - Technology: Oracle SOA Suite 11g, Oracle Enterprise Repository 11g, Oracle Enterprise Manager 12c Other tools and methods:, Oracle Unified Method, Oracle Enterprise Architecture Framework
MTN Next! – Enterprise Back-office Consolidation Program	- Customer: MTN Group - Industry: Telco - Country: South Africa - Language: English - Role: SOA and Integration Architect in Back-office Consolidation Program for MTN Group - Date/Duration: 05/2013 – 04/2014 Description: Project of building new Shared Service Center (SSC) for MTN Group on top of Oracle ERP stack. Member of SOA Governance Board and Design Authority for all the SOA & Integration processes and SSC services. Proposing supported Oracle Integration Solution Concepts. Reviewing and approving SOA & Integration Use cases, Detailed Designs Reviewing and helping to design and implement Disaster Recovery Strategy and SSC Non-functional requirements. Making Enterprise Architecture decisions as SOA/Integration Authority in Design Architecture

	• Technology: Board Delivering SOA Assessment and Program SOA Roadmap Review and advisory for the integration process design(BPA/BPM 11g) Oracle EBS stack, Fusion Apps for HR, Oracle Hyperion EPM, Oracle Demantra, Oracle Fusion Accounting Hub, Oracle Primavera PPM, OBIEE, BI Apps, Oracle Product Hub, Oracle Supplier Hub, Oracle Customer Hub, Oracle Site hub, AIA for Communications 11g(O2C, PMDM, CDM), Weblogic, Oracle SOA Suite 11g, , AIA for Communications 11g(AABC, O2C, O2B, O2A, PMDM PIPS), Oracle WebCenter Content Management 11g, Oracle Business Intelligence Publisher 11g, ODI 11g, Oracle WebCenter Imaging Other tools and methods:, Oracle Unified Method, Oracle Enterprise Architecture Framework, Apache Ant, JDeveloper, Oracle BPM Suite, Oracle BPA, Oracle BPM 11g
New Vodafone – Enterprise Architecture Foundation Pack	• Customer: Vodafone <u>Group</u> • Industry: Telco • Country: U.K. • Language: English • Role: SOA and Integration Architect in Enterprise Architecture Foundation Pack for Vodafone Group • Date/Duration: 03/2013 – 05/2013 • Description: Project of building new Vodafone Communications Pack on top of Oracle RODOD/RSDOD, Oracle Retail Stack + Vodafone New Communication Program (Release 2.2) and Vodafone Group requirements (NewVo). Gathering Requirements and Architecture Discovery process – goals, capabilities, enablers for NewVo, Reusable Assets Analysis, FMW Configuration Mgmt improvement. (Responsible for SOA and Integration domain). • Technology: Oracle RODOD BSS/OSS stack: Oracle Weblogic, Oracle SOA Suite 11g, AIA for Communications 11g(O2C), AIA for Communications 11g(AABC, O2C, O2B, O2A, PMDM PIPS), Oracle CRM Siebel 8.1, Oracle Order Management OSM, Oracle ASAP, Oracle Universal Inventory Management, Oracle WebCenter Content Management 11g, Business Intelligence Publisher 11g, Oracle Billing and Revenue Management BRM 7.5, Oracle Product Data Hub for Comms OPH4C, ODI 11g Oracle RLTP stack: Oracle Distributed Order Management, Oracle Global Order Promising, RMS, RSIM, RPOS,RPM. Other tools and methods:, Oracle Unified Method, Oracle Enterprise Architecture Framework,

**New Communications –
Enterprise Architecture
Governance**

- Customer: Vodafone UK
- Industry: Telco
- Country: U.K.
- Language: English
- Role: SOA and Integration Architect in Enterprise Architecture Board for NewCo Program
- Date/Duration: 02/2012 – 03/2013
- Description:

Project of building new Core Communications parallel with old Vodafone UK Enterprise System (NewCo).

Oracle RODOD Architecture Governance extension and configuration advisory.

Making Enterprise Architecture decisions as SOA/Integration Authority in Enterprise Architecture board for NewCo

Designing Invoicing End To End process using Oracle BSS stack (BRM, CRM, BIP, FMW, UCM)

Designing and advisory for Collections Management Extensions.

Estimations and impact analysis.

Governing NewCo program SOA architecture with Retail and Online programs

Reviewing customizations and designing custom Integration Use Cases for NewCo Program.

Approving and Designing new integration processes and migration use cases.
- Technology: Oracle RODOD BSS/OSS stack: Oracle Weblogic, Oracle SOA Suite 11g, AIA for Communications 11g(O2C), AIA for Communications 2.5(AABC, O2B, O2A, PMDM PIPS), AIA 3.1, ODI 11g, Oracle SOA Suite 10.1.3.4, Oracle CRM Siebel, Oracle Order Management OSM, Oracle ASAP, Oracle Universal Inventory Management, WebCenter Content Management 11g, Business Intelligence Publisher 11g, Oracle Billing and Revenue Management BRM, Oracle Product Data Hub for Comms OPH4C, Apache Ant, JDeveloper

IDIKA - Application Performance Optimization and Troubleshooting	• Customer: Ministry of Healthcare • Industry: Public Sector • Country: Greece • Language: English • Role: FMW Technical Specialist • Date/Duration: 05/2012 • Description: Technical Architecture Review, WLS Cluster Configuration Review, Performance optimization process baseline setup, Short period optimization plan. • Technology: OVM 3.0, Oracle FMW 11g, Oracle Weblogic Server 10.3.5, Oracle ADF, Oracle BIP 11g, Oracle DB RAC 11g, Enterprise Manager 12c, JRockit Mission Control, Oracle Enterprise Linux
Machine to Machine - Application Integration Architecture	• Customer: Vodafone UK • Industry: Telco • Country: U.K. • Language: English • Role: AIA Technical Architect • Date/Duration: 01/2012 • Description: Preparation of Technical design and Technical Architecture verification template for Machine 2 Machine project. • Technology: Oracle Weblogic Server, Oracle SOA Suite 11g, AIA for Communications 11g(O2C), Oracle CRM Siebel, Oracle Order Management, Oracle Billing and Revenue Management, Oracle Product Data Hub, Apache Ant, JDeveloper
Enterprise Service Framework - Application Integration Architecture	• Customer: MTN Uganda • Industry: Telco • Country: Uganda • Language: English • Role: SOA and AIA Solution and Technical Architect • Date/Duration: 01/2012 • Description: SOA assessment, Production environment Health Check, SOA Architecture Review, Performance Management Strategy Setup • Technology: Oracle Weblogic, Oracle SOA Suite 11g, AIA for Communications 11g FP, Oracle OSB 11g, LoadUI, SOAP UI, Apache Ant, JDeveloper

New Communications Programme - Application Integration Architecture	• Customer: Vodafone UK • Industry: Telco • Country: U.K. • Language: English • Role: Integration Architect, AIA Technical Architect • Date/Duration: 07/2011 – 12/2011 • Description: - Technical design for AIA Sync/Async Deployment topology using the same business data. - Technical Architecture documenting. - AIA Cluster installations and deployment for several environments Production clusters including. - Environments Health check, Verification and Housekeeping documentation creating. Technical design for Synchronous and Asynchronous processes Deployment Architecture. • Technology: Oracle Weblogic, Oracle Service Bus 11g, Oracle SOA Suite 11g, AIA for Communications 2.5(AABC, O2B, O2A, PMDM PIPS), AIA 11g FP, ODI 11g, Oracle SOA Suite 10.1.3.4, (Oracle CRM Siebel), Oracle Order Management, Oracle BRM, Oracle Product Data Hub, Apache Ant, JDeveloper
NGOSS review - Enterprise Architecture Framework	• Customer: MTN South Africa • Industry: Telco • Country: Republic of South Africa • Language: English • Role: Integration Architect, AIA Solution Architect • Date/Duration: 10/2011 • Description: - Evaluation of the Enterprise Architecture Framework. Business impact analysis for the integration projects in case of usage Application Integration Architecture methodology. AIA FP for Comms as the framework accelerator. Evaluation and explanation of AIA FP for Comms alignment to the industry standards eTOM, SID, TAM. - Integration Patterns with Common Domain model presentation and AIA FP and UML/BPA standards alignment. • Technology: Oracle Weblogic, Oracle SOA Suite 11g, Oracle OSB 11g, AIA for Communications 3.1 FP, Oracle CRM (Siebel), Custom Billing System, Custom Network Layer Adapter System, Custom Troubleshooting, ...

WLS - Automatic Domain Creation, Continual Deployment and Monitoring (private Cloud)	- Customer: A.P. Moller - Maersk Group - Industry: Transportation - Country: Denmark - Language: English - Role: Oracle Technical Specialist - Date/Duration: 12/2010-06/2011 Description: Automatization of the Solution Environment setup/creation/deployment for different types of WebLogic domains: OSB, Portal/Frontend, Coherence, CMS and simple WLS domains. Automatic domain creation scripting and maintenance. WLS infrastructure troubleshooting. OSB infrastructure monitoring and troubleshooting. Coherence – Cache Model Maintenance, Data Access Object Creation, Cache grid configuration and deployment Configuration of OSB proxy services for Oracle BPM workflows Channel Architecture Clustering design - Technology: Oracle WLS, OSB, Coherence, Hudson, Nexus, Selenium, Eclipse, Maven 2.0, IntelliJ, Python, WLST, Shell, SVN.
Insurance Business Execution – SOA 10g Performance Optimization	- Customer: ITSV IT-Services for Social Insurance - Industry: Insurance - Country: Austria - Language: English - Role: SOA 10g Technical Specialist - Date/Duration: 11-12/2010 - Description: Environment description and evaluation. Performance Issues Hypothesis creation and evaluation. Performance Optimization and Tuning. Creation of Optimization Strategy. - Technology: OAS 10g, SOA 10g 10.1.3.5, Java Development Kit Tools, JDeveloper 10g, Thread Dump Analyzer, SOAP UI
Telco Enterprise Release – SOA 11g Order Management and Provisioning	- Customer: TT NET - Industry: Telco - Country: Turkey - Language: English - Role: SOA 11g Technical Specialist - Date/Duration: 11/2010 - Description: Integration Development team coaching. Ant deployment scripts creation, deployment testing. MDS and Composites deployment system to several environments. Release deployment validation and support. Draft creation for Configuration and deployment guide for Sales Order Management and Provisioning. - Technology: WLS, SOA 11g, Apache Ant, JDeveloper 11g

Telco Enterprise Release - Application Integration Architecture	• Customer: Infosys Ltd / Vodafone Qatar • Industry: Telco • Country: India • Language: English • Role: Integration Architect/AIA Technical Specialist • Date/Duration: 09-10/2010 • Description: Integration Development team coaching. Sales Order Fulfillment knowledge transfer and Enterprise Release Solution mapping into implementation architecture. Release deployment validation and support. Configuration and deployment guide for Sales Order provisioning creation. • Technologies: Oracle AS, BPEL PM, ESB, AIA for Communications 2.0.1, Oracle SOA Suite 10.1.3.5, Apache Ant, JDeveloper
BSS Clustering and Initial tuning	• Customer: Portugal Telecom / PT SI • Industry: Telco • Country: Portugal • Language: English • Role: SOA/AIA Technical Specialist • Date/Duration: 09/2010 • Description: Production cluster installation sanity check and tuning, Installation and Configuration issues for AIA 2.5.1 Patch set resolution, BRM – AIA – CRM Collections Management setup(ODI 10g). Pre-production environment cluster installation advisory. OOTB and AABC PIPs and PIPs Extensions deployment support • Technologies: Oracle AS, BPEL PM, ESB, ODI, AIA for Communications 2.5.1, Apache Ant, JDeveloper
BSS Fulfillment CRM to Activation	• Customer: Vodafone Albania / ATOS Origin • Industry: Telco • Country: Greece • Language: English • Role: SOA/AIA Technical Specialist, Architecture Designer • Date/Duration: 07/2010-08/2010 • Description: Central Fulfillment Framework setup for CRM Sales Order provisioning to Activation Platforms(Network, Resource, VPN and Surepay) AIA for Comms customization – project technical infrastructure maintenance advisory Developer Users Guide and Housekeeping Instructions documents creation (6 Enterprise Systems Integration – BRM, CRM, Viper – Network provisioning system, Surepay, VPN-IN, Resource Management) • Technologies: Oracle AS, BPEL, ESB, OSR, AIA for Communications 2.4, Apache Ant, JDeveloper , UML Use Case and Class diagrams in JDeveloper

**AIA for Communications
Portugal Telecom**

- Customer: PT SI Portugal
 - Industry: Telco
 - Country: Portugal
 - Language: English
 - Role: SOA/AIA Technical Specialist, Architecture Designer
 - Date/Duration: 05/2010-07/2010
 - Description: Production Environment Topology Design, Production Environment Sizing.
AIA for Comms customization – project technical infrastructure setup.
Customization Installation and Deployment design/implementation.
Migration processes Use case analysis and Technical design
Developer Cookbooks and Housekeeping Instructions documents creation
(7 Enterprise Systems Integration – BRM, CRM, NET_WIN – Network provisioning system, SAP, Order Management, Trouble Ticket Management, Resource Management)
 - Technology: Oracle AS, BPEL, ESB, OSR, AIA for Communications 2.5, AIA for Communications 2.5.1 Patch Set, Apache Ant, JDeveloper , UML Use Case and Class diagrams in JDeveloper
-

**AIA for Communications
Red Release**

- Customer: Vodafone Qatar
- Industry: Telco
- Country: UK
- Language: English
- Role: SOA/AIA Technical Specialist, Architecture Designer
- Date/Duration: 08 /2009-05/2010
- Description: Red Release Architecture Design.
Resource Management Design and Real Time Balance Design.
Autopay and Replenishment Design.
Product Catalog Enhancements and Order Fulfilment implementation.
Telco Subscriber Disconnection Design.
Migration processes Use case analysis and Technical design
VFQ SOA Platform Housekeeping and Maintenance Guide creation
(6 Enterprise Systems Integration – BRM, CRM, ASAP, WebShop, Payments, Surepay)
- Technology: Oracle AS, BPEL, ESB, OSR, AIA for Communications 2.0, AIA for Communications 2.0.1 Patch Set, Apache Ant, JDeveloper, UML Use Case and Class diagrams using JDeveloper

AIA for Communications Online Release	- Customer: Vodafone Qatar - Industry: Telco - Country: UK - Language: English - Role: SOA/AIA Technical Specialist, Architecture Designer - Date/Duration: 05-08/2009 - Description: Autoreplenishment Reporting, Order Decomposition Configuration, Optional Supebundle Support, Production Support, Web channel and other channels integration design Migration processes Use case analysis and Technical design (5 Enterprise Systems Integration – BRM, CRM, ASAP, WebShop, Payments) - Technologies: Oracle AS, BPEL, ESB, OSR, AIA for Communications 2.0, AIA for Communications 2.0.1 Patch Set, Apache Ant, JDeveloper , UML Use Case and Class diagrams in JDeveloper
T-Mobile EShop Product Catalogue Service Layer	- Customer: T-Mobile Slovakia - Industry: Telco - Country: Slovakia - Language: English, Slovak - Role: JEE Technical Architect - Date/Duration: 03-04/2009 - Description: Design and implementation of the Product Catalogue services layer for the Internet Eshop Portal application. Components for Loading/Reloading the Telco Product catalogue parts, Facades for remote/local service consumers, startup/shutdown and product catalogue lifecycle components design and implementation. Eshop Technical Architecture Design. - Technologies: Sun4v sparc SUNW, 5.10, Sun AS 8.2, Apache Maven 2.3, NetBeans 6.5, JEE(MDB, Stateless Session EJB, JMS, Servlets, JSPs), Oracle FMW(BPEL,ESB), JDeveloper , UML Analysis using Anterprise Architect
AIA Foundation Pack Performance Tunning	- Customer: British Telecom - Industry: Telco - Country: HP EPC, Stuttgart Germany - Language: English - Role: SOA Technical Specialist - Date/Duration: 02/2009 - Description: Installation and setup of the FMW Production cluster – Oracle AS and Fusion Middleware Clustered Installation, Clustered installation of the AIA 2.3 FP – testing environment, AIA PIPS deployment. Oracle Webcache – SW load balancer installation and configuration. Linux Red Hat 5.2 system – SW packages install and prepare system prerequisites for the Oracle Products

	Technology: Oracle AS 10.g, FMW 10.1.3.4, OSR 10.3, AIA 2.3 FP, Oracle WebCache 10.1.2.2, Apache Ant.
Telenor Serbia – SOA Adoption	- Customer: Telenor Serbia - Industry: IT - Country: Serbia - Language: English - Role: SOA Architect - Date/Duration: 03/2009 - Description: Preparing Estimations and project plan for SOA Adoption. Planning activities for SOA adoption and SOA Governance. (Bid materials) (20 Enterprise Systems Integration) - Technology: Oracle Unified Method Framework
AIA for Communications	- Customer: Vodafone Qatar - Industry: Telco - Country: UK - Language: English - Role: SOA Technical Specialist - Date/Duration: 01/2009 - Description: Production clusters - Fusion Middleware Installation, Clustered installation of the AIA for Communications – production environment, AIA PIPS deployment. Two production environments/localities created. - Technology: Oracle AS, BPEL, ESB, OSR, AIA for Communications 2.0, AIA for Communications 2.0.1 Patch Set, Apache Ant.
Zurich Financial Systems	- Customer: Zürich Versicherungs-Gesellschaft - Industry: Insurance - Country: Switzerland - Language: English - Role: SOA Technical Architect - Date/Duration: 12/2008 - Description: SOA Architecture Review, Service registry - ALSB UDDI performance tuning, SOA Webservice Registration Framework review, SOA Deployment review, Load Testing. - Technology: Oracle Weblogic Server, Systinet SR, Oracle Service Bus(BEA ALSB), Oracle Service Registry, SOAP UI 2.5

T-Com Real Time Provisioning	• Customer: T-Com / Telecom Slovakia • Industry: Telco • Country: Slovakia • Language: Slovak • Role: SOA Technical Specialist • Date/Duration: 11/2008 • Description: SOA production migration support. Deployment and production environment Health Check. SOA execution audit and support. • Technology: Oracle SOA suite, Oracle AS, Oracle Jdeveloper
HP – Order Management	• Customer: HP Slovakia • Industry: IT • Country: Slovakia • Language: English • Role: SOA Architect • Date/Duration: 11/2008 • Description: Preparing Estimations and project plan for SOA process management project for New Order application. Preparing Architecture blue print for the solution. (Bid materials) (22 Enterprise Systems Integration) • Technology: Oracle Unified Method Framework
Mobile Banking Middleware Platform for BCR Bank	• Customer: Banca Comerciala Romana • Industry: Financial • Country: Romania • Language: English • Role: SOA Architect • Date/Duration: 08/2008-10/2008 • Description: Designing Interfaces and SOA orchestration to integrate Wizzit (Mobile Banking and Debit Card System) system and Sibcore (Core banking System). Creating Synchronous Service Façade for the asynchronous enterprise services. Preparing global build scripts skeleton for SOA project deployment. Configuring and securing services using Oracle Web Service Management. • Technology: Oracle SOA suite, Oracle Jdeveloper, SOAP UI , UML Analysis using Enterprise Architect tool
Health Insurance Enterprise System and Oracle EBS Integration	• Customer: Landsbond der Christelijke Mutualiteiten (LCM) • Industry: Health Insurance • Country: Belgium • Language: English • Role: SOA Expert • Date/Duration: 04/2008-09/2008 • Description: Taking Over the Integration Framework, Designing Workflows and Notification Services, Configuring Deployment for Development, Testing, Pre-Production and Production Environment. Coaching and mentoring.

	Configuring SOA for OSSO. Preparing global build scripts for SOA projects deployment to the various target environments. Technology: Oracle SOA suite, Oracle Service Registry(UDDI), Oracle JDeveloper
Pensionsversicherungsanstalt Austria	• Customer: PVA, Hauptstelle Wien • Industry: Public Establishment • Country: Austria • Language: English • Role: SOA Architect • Date/Duration: 03/2008-04/2008 • Description: Preparing Architecture Blueprint, Disaster recovery and High availability concept for bid. Designing PoC content and presentation plan. Implementing ADF process flow starting pages to PoC. Technology: Oracle SOA suite, Oracle ADF, Oracle JDeveloper
Turkish General Stuff	• Customer: KOC Sistem Turkey • Industry: Government • Country: Turkey • Language: English • Role: JEE specialist • Date/Duration: 03/2008-04/2008 • Description: PoC of JEE application migration from from IBM Websphere to OC4J. Creating new deployment, deployment configuration and deployment plan. CAS opensource SSO migration from IBM WebSphere to OC4J. Enabling SSL on HTTP server and OC4J. Enabling certificate authentication CA using CAS SSO. Preparation for JSR-168 Portlet migration from IBM Websphere to OC4J using Oracle Portlet Development Kit Technology: Oracle AS, Oracle Portal, Oracle JDeveloper
Business Processes Implementation project	• Customer: T-Mobile Slovensko • Industry: Telco • Country: Slovakia • Language: Slovak/English • Role: SOA specialist • Date/Duration: 01/2008-02/2008 • Description: Implementation of BAM reports to core business processes and modifying processes to monitor KPIs. Exposing business processes as the services to internet consumers using Oracle Web Service Manager component. Technology: Oracle SOA Suite, Business Process Analyst – Oracle BPA, Business Activity Monitoring
Technical Consultant (7.1993-12.2007 SOFTEC Bratislava)	Since 07/1993 I I was working for Softec Bratislava taking the wide range of responsibilities depending on project role. .

Česka Pojistovna Application
Platform of Česka Pojišťovna

- Customer: Česká pojišťovna a.s.
- Industry: Insurance
- Country: Czech Republic
- Language: Czech, English
- Role: J2EE Architect, Application Architect
- Date/Duration: 2/2005-12/2007
- Description: Design, Implementation and Support of Integration Service Oriented Framework of Centralized Client Service. Creating technical designs of application architecture. Reviewing code, technical designs, and application deployments for Application Platform of Ceska Pojistovna (APCP). (BEA WLS, BEA WLI, J2EE)

UML and Process modeling using Enterprise Architect
J2EE applications production performance tuning

Česka Pojistovna Application
Platform of Česka Pojišťovna

- Customer: Česká pojišťovna a.s.
- Industry: Insurance
- Country: Czech Republic
- Language: Czech, English
- Role: J2EE Architect
- Date/Duration: 2/2007-10/2007
- Description: Disaster recovery management for Application Platform of Ceska Pojistovna APCP. (BEA WLS, BEA WLI, J2EE)

ITIL process implementation support for:

Configuration Management

Service Level Management

Capacity Management

Implementation for APCP platform of Ceska Pojistovna – platform specific activities design

Česka Pojistovna Self Care
Area

- Customer: Česká pojišťovna a.s.
- Industry: Insurance
- Country: Czech Republic
- Language: Czech, English
- Role: Solution Architect
- Date/Duration: 7/2007-9/2007
- Description: Process analysis of business intention for Self-Care Area Internet application. Creating business context and process design. Mapping processes into logical architecture. Analysis of the technical impacts to application infrastructure of Ceska Pojistovna. Evaluating business intention costs for future project realisation. Integration flow design. (6 Enterprise Systems Integration)

UML and Process modeling using Enterprise Architect

Tatrabanka PoC vEvaluation

- Customer: Tatrabanka a.s.
- Industry: Financial
- Country: Slovak Republic
- Language: Slovak, English
- Role: Technical Architect
- Date/Duration: 7/2007
- Description: Evaluation support for Proof of Concept of Portal Development for and Common Frontend Platform Tatrabanka a.s. Environments. (BEA ALUI, BEA ALBPM, IBM WebSphere Portal, IBM Websphere AS, Linux)

ŽELOS Production Controlling

- Customer: ŽELOS a.s,
- Industry: Manufacture (Railway Carriage Services and Production)
- Country: Slovak Republic
- Language: Slovak
- Role: Project Leader
- Date/Duration: 5/2004-2/2005
- Description: Analysis and designing of business cases and production control (ASP .NET C#, XML, XSL, Web Services, Transact SQL, Telelogic Tau Suite (UML), MsSQL2000).

Doprastav Integration Subsystem

- Customer: Doprastav a.s.
- Industry: Manufacture (Building Highways, Tunnels, ..)
- Country: Slovak Republic
- Language: Slovak
- Role: Team Leader
- Date/Duration: 7/2003-2/2005
- Description: Design and implementation of the Integration Subsystem of Central Data Management of Integrated Enterprise Information System. (ASP.NET, C#, XML, XSL, Telelogic Tau Suite (UML), MSSQL 2000 Server)
Microsoft Active Directory (Mastering Users, Employees, Roles)

PBTrade E-commerce

- Customer: PBTrade s.r.o
- Industry: E-Trade
- Country: Slovak Republic
- Language: Slovak
- Role: Project Leader
- Date/Duration: 7/2003-2/2005
- Description: Development of the Internet system for presentation of companies marketing and business information. (J2EE, XML, HTML, CSS MsW2k/Linux, Postgres 7.2, ANSI SQL, Telelogic Tau Suite (UML), JBoss/Catalina)

Vienna Insurance Group	• Customer: Vienna Insurance Group • Industry: Insurance • Country: Slovak Republic • Language: Slovak, English • Role: Analyst/Developer • Date/Duration: 06/2002-4/2003 • Description: Analysis, designing and implementation of parts of Insurance Information System: Balance Accounting of Insurance Accident, (Centura SQL/ Gupta, MsWNT/MsW2k, MsSQL 2000, Transact SQL, Telelogic Tau Suite).
Hornonitrianske Bane a.s. Central Supplying	• Customer: Hornonitrianske Bane a.s. • Industry: Manufacturing (Coal Mines) • Country: Slovak Republic • Language: Slovak • Role: Analyst/Developer • Date/Duration: 02/2003-4/2003 • Description: Redesigning for Centralized Supplying part of the General ERP System (Unixware, Informix 4gl, Informix OnLine 7.3, B-shell).
Novácke Chemické Závody a.s. Portal PoC	• Customer: Hornonitrianske Bane a.s. • Industry: Manufacturing (Chemical Production) • Country: Slovak Republic • Language: Slovak • Role: Project Leader/Developer • Date/Duration: 12/2002-3/2003 • Description: Development of the Small Intranet Portal Application (IBM WebSphere Portal Express Extranet Plus 4.1, IBM WebSphere Application Server, Citrix MetaFrameXP)
Česká Spořitelna a.s. Portal Development	• Customer: Česká Spořitelna a.s. • Industry: Financial • Country: Czech Republic • Language: English • Role: BEA Developer • Date/Duration: 6/2002 • Description: BEA Portal and BEA App. Server Configuration Works, Programming of the CMS Parser (J2EE, XML, HTML, CSS MsW2k/HP Unix, Oracle8i, PL-SQL, BEA WLS, BEA Portal)
Softec Bratislava – Office Support Registry	• Customer: Softec Bratislava • Industry: IT • Country: Slovak Republic • Language: English • Role: Developer • Date/Duration: 7/2001-11/2001 • Description: Intranet Application – Branch Office Support (J2EE, XML, HTML, CSS MsWNT/MsW2k, MsSQL 7.1/Postgres, Transact SQL/ANSI SQL, JBoss/Tomcat/Bea WLS)

Vienna Insurance Group

- Customer: Vienna Insurance Group
- Industry: Insurance
- Country: Slovak Republic
- Language: Slovak, English
- Role: Analyst/Developer
- Date/Duration: 02/2000-8/2002
- Description: Analysis, designing and implementation of parts of Insurance Information System: Policy Indexing, Policy Dynamization (Centura SQL/ Gupta, MsWNT/MsW2k, MsSQL 2000, Transact SQL), ErWin (UML).

ERP redesign

- Customer: VŠZP, Hornonitrianske Bane a.s.
- Industry: Manufacturing, Health Insurance
- Country: Slovak Republic
- Language: Slovak, English
- Role: Developer
- Date/Duration: 06/1998-1/20002
- Description: Project of complex Y2K transformation of the General ERP System(Digital Unix, Unixware, SCO Unix, Informix 4gl, Informix OnLine 5.x-7.1, B-shell, Uniplex)

Hornonitrianske Bane a.s ERP

- Customer: Hornonitrianske Bane a.s.
- Industry: Manufacturing (Coal Mines)
- Country: Slovak republic
- Language: Slovak
- Role: team leader, analyst, developer
- Date/Duration: 2/1997 – 12/1999
- Description: Development of the Complex Enterprise IT system including management information system and office automation systems – Job Record Monitoring & Gross Wage – Subproject Leader(Digital Unix, Unixware, Informix 4gl, Informix OnLine 5.x-7.1, B-shell, Uniplex)

Strojárne Prievidza a.s ERP

- Customer: Strojárne Prievidza a.s.
- Industry: Manufacturing (Engineering)
- Country: Slovak Republic
- Language: Slovak
- Role: analyst, developer
- Date/Duration: 12/1997 – 12/1999
- Description: Development of the Complex Enterprise IT system including management information system and office automation systems – Job Record Monitoring & Gross Wage – Subproject Leader(Digital Unix, Unixware, Informix 4gl, Informix OnLine 5.x-7.1, B-shell, Uniplex)

VšZP Payment Backup System

- Customer: VšZP
- Industry: Health Insurance
- Country: Slovak Republic
- Language: Slovak
- Role: developer
- Date/Duration: 7/1995 – 12/1995
- Description: Development of the Information system for General Health Insurance Company – Payment Backup System(Digital Unix, Informix 4gl, Informix OnLine 5.x-7.1, B-shell)

VšZP, Bespa a.s. ERP

- Customer: VšZP, Bespa a.s.
- Industry: Health Insurance, Manufacturing (Mine Construction)
- Country: Slovak republic
- Language: Slovak
- Role: developer
- Date/Duration: 7/1993 – 7/1995
- Description: Development of the Enterprise Management System for Mine Construction Company Prievidza and Slovak General Health Insurance Company(SCO Unix, Informix 4gl, Informix OnLine 5.x-7.1, B-shell)
